

How to prepare an abstract for HPES2002

S. Suga, S. Imada, A. Sekiyama and N. Nanigashi¹

Graduate School of Engineering Science, Osaka University

¹*Faculty of Science, COE University*

Please prepare an abstract either in PDF, Microsoft Word or LaTeX. In the case of LaTeX, use the template file available from the Web-page. An example file for Microsoft Word is found in the Web-page, too. All the submitted abstracts are planned to be converted into PDF files. Then all the submitted abstracts can be viewed on-line from a few weeks before the workshop. Please note that if the file sent to us cannot be printed out, we might ask you to resubmit in another format.

Abstracts are to be in English. The size of the abstract should be A4 (21 x 29.7 cm²), one page. Margins of 2.5 cm should be taken from all the top, bottom, left and right sides. The title should be bold-faced and center-lined. The list of authors and their affiliations should be center-lined and the latter should be in italic. The body of the abstract should be written in fonts not smaller than 11 pt.

Figures can be included but please do not make the file-size too big. In the case of Microsoft Word, use only JPEG or Windows Metafiles (WMF). In the case of LaTeX, use only EPS.

References should be listed just below the abstract body[1].
